

Commission Free Trading

Unlimited Commission Free Trading for Stocks and Options

Why pay a broker when you don't have to?

We are pleased to offer unlimited commission free trading for stocks and options through our partnership with Tradier Brokerage to subscribers of the Delphian platform.

Seem too good to be true? It isn't.

We want our subscribers to enjoy hassle-free benefits, and commission free trading is a big one! You will have straight-forward exchange and regulatory pass along fees. But there are *no commission fees* for stocks or options, with no limit on shares, contracts or legs per order or per month!

We make it easy to trade your optimal trade strategies within the Delphian platform:

- You can create, backtest, optimize and design your trade plans based on individual risk-reward expectations.
- Once desired trade plans are locked in for live market scans, the Delphian platform will identify the right stocks, options with strikes and expirations that match the trade plans and send alerts.
- These trades can be directly sent to Tradier for commission free trading or use your own brokerage.
